

HOW TO USE YOUR BINOCULAR

A. IPD ADJUSTMENT

Set the interpupillary distance by viewing through the eyepieces while grasping the body and bending them apart and together until you can see one circle of view. If your binocular has an IPD scale, the setting for your eyes will be indicated on the PD scale. (Note the setting for later use.)

B. FOCUSING

1. Close your right eye and sight an object with your left eye. Focus the binocular by rotating the center focus wheel until the image is sharp and clear.
2. Open your right eye and close your left eye. Rotate the right eyepiece until the object sighted is sharp and clear. (Note the setting of the diopter scale for later use.)
3. Both sides (eyes) are now in focus and you will need to use only the center focus wheel to focus on other objects.

C. ZOOM BINOCULARS

If your binocular is a zoom binocular, move the zoom lever to increase or decrease the power.

D. RUBBER FOLD-DOWN EYECUPS

Fold down for use with eyeglasses and fold up for use without eyeglasses. They provide comfort and promote viewing ease.

E. TRIPOD ADAPTER FITTING

Some models of binoculars feature a built-in tripod adapter fitting. On these models, a knurled cap-screw is located at the base of the binocular hinge.

HOW TO CARE FOR YOUR BINOCULAR

- A. Keep the lens covers (that come with your binocular) on the lenses when the binocular is not in use.
- B. When wiping the lenses, use the lens cloth that comes with the binocular, or a soft, lintless cloth.
- C. To remove any remaining dirt or smudges, add one or two drops of isopropyl alcohol to the cloth.
- D. Store your binocular in a moisture-free area.

VERY IMPORTANT

Never attempt to clean your binocular internally or take it apart.

CAUTION! Viewing the sun can cause permanent eye damage. Do not view the sun with this product or even with the naked eye.
